CAROLUS POTATOES

SEE GILL TAMSETT, OUR TRADING SECRETARY'S REPORT ON PAGE 2 THAT INCLUDES SOME VERY USEFUL INFORMATION ABOUT THE SEED POTATOES NOW AVAILABLE IN THE STORE.

From The Running Hare by John Lewis-Stempel

<https://uk-mg42.mail.yahoo.com/neo/launch>

I am happy harrowing, an emotional state which may, according to scientists at the University of Bristol, be enhanced by soil itself. A specific soil bacterium, Mycobacterium vaccae activates a set of serotonin-releasing neurons in the dorsal raphe nucleus of the brain, the same ones targeted by Prozac. You can get an effective dose of Mycobacterium vaccae by walking in the garden or gardening.

CHAIR'S REPORT

Happy New Year to you all.

I am sure you are planning for the coming growing year, so have a look at our new monthly guide on what to do on your plot (see later in this Bulletin or on our website) and you will find plenty to be getting on with!

RENTS We will be collecting rents in March this year (instead of April) and opening the store on both **Saturdays (9-11) and Sundays (10 – 12) throughout March.** This is in response to the requests from several members who find it awkward to get to the store on a Sunday.

LEASE / CHARITY As we start 2018 I am sorry to report that we are still no further on with the Council over the proposed Lease, as reported at the AGM. The debate is over the degree of independence the Council will allow us in our new Lease. The Charities Commission demands that all charities are operationally independent of “the State” (in our case Wandsworth Borough Council). We also regard this operational independence as crucial; we cannot agree to a Lease that will leave the new Charity on unsound financial foundations or in a way that makes the Charity a surrogate arm of the Council or a service provider.

TRADING SECRETARY'S REPORT

The Store is fully stocked in readiness for the major sowing season. Volunteers have also given it a good clean and tidy-up and I am very grateful to them for giving up their time to do this.

We are awaiting delivery of the Wool Compost for Seeds that was so popular last year. We will be selling this at the same price as last year - £7 for a 12-litre bag. We also have Gro-Sure Seed and Cutting Compost in the easy to carry 10 litre bags for £3.50 as well as John Innes Seed Compost in 25 litre bags for £4.

The potatoes finally arrived having been delayed in the main to the bad weather conditions in Scotland that, at one point, suffered temperatures of -8C!

We have 6 varieties to choose from all at £2 per kilo (you can pick and mix):

SWIFT - First Early. This is an exceptionally early variety, which produces lots of small, round potatoes. The plants are short making them ideal for growing in containers, or under cloches for an even earlier crop. Good for boiling and salads.

KESTRAL - *Second Early*, with attractive white skins with purple eyes. Good for boiling, mash, chips, roasting and salads.

CHARLOTTE - a Salad potato, ever popular, with a creamy flavour. Good for boiling, roasting and salads.

PICASSO - *Maincrop* with a smooth white skin and pink eyes with a good resistance to disease. Cara is one of its parents. It produces large yields that keep well. Good for boiling, roasting, mash and baked.

PINK FIR APPLE - *Maincrop* with a pink knobby skin and a creamy, waxy texture. It was originally introduced from France in 1850. It is good for boiling and salads.

CAROLUS - *Maincrop* with a slightly floury texture with pink eyes and yellow flesh. It is fully blight resistant and is thus well suited for those who like to grow organically. It can be boiled, roasted or mashed.

Potatoes are organised into 3 groups according to their season of harvesting. *Early* potatoes are planted in late March/early April for harvesting in June/July. *Second Earlies* are planted in early-mid April for harvesting in July/August. *Maincrop* potatoes are planted in mid-late April and lifted in August for immediate use or in September/October for putting into storage.

Potatoes remain dormant at 4C. The purpose of chitting is to break this dormancy and encourage them to produce short green shoots. This advances their growth prior to planting.

To induce sprouting the seed potatoes should be exposed to good light and gentle warmth (12C). Set them in egg cartons with the scar, i.e. where it was attached to the original plant, at the bottom and the eyes, or the growth buds, at the top. The chitting process should last about 6 weeks

by which time the sprouted shoots should be 2cms long.

It is only necessary to chit Early and Second Early potatoes. Chitting Maincrop is not so critical as they can be planted directly into warm soil.

Potatoes grow best in fertile, free-draining, well-structured soil with lots of organic matter with a pH of 5.5-7. If lime is added, this should be done at least 6 months before planting.

This year we are trialling opening the Store on Saturday mornings between 9 and 11 am during March and April. This is to cater for those members who have other commitments on Sunday mornings and as we are no longer opening on Wednesday evenings in April.

Do let us know how helpful you find this.

Gill Tamsett, Trading Secretary

PLOT JOBS FOR FEBRUARY

- Prepare for early vegetable crops by warming soil before sowing, covering seedbeds with polythene or cloches
- Keep off wet soils to avoid compaction. Use long boards as walkways, to spread your weight
- If the soil isn't too wet, start to dig in overwintered green manures such as grazing rye and winter tares, as the frost should have killed them off.

- Continue to tidy up and re-cut grass path edges where the grass has encroached on your plot.
- Give your compost heap a 'spring turn' this month. Turning will aerate and stimulate the heap. If it's too dry, continue adding wet kitchen waste, and water it occasionally. If too wet, add more carbon-rich stuff such as twigs, crumpled cardboard and paper waste, to open up and aerate the heap. Continue to add layers of uncomposted stable manure to your heap.
- Empty compost heaps when ready and spread the well-rotted dark crumbly compost on beds prior to sowing or use as seed compost.
- Chit potato tubers in a light, cool, frost-free place.
- Clean pots and trays by scrubbing in hot, soapy water before starting to sow new seeds. Pests and diseases can overwinter in old potting compost, surviving to damage newly emerging seedlings.
- Sow sweet peas in deep pots or Root-trainers in a cold frame, greenhouse or windowsill. *(A wide range of sweet peas - single varieties such as King's High Scent and Midnight as well as mixes e.g. Mammoth mixed and Incense are all available in store. Root trainers are available in store as well as free pots in the pot box next to the store.)*
- Pot on and pinch out autumn-sown sweet peas to encourage side-shoots to form.
- Sow tomatoes. *(Check out the range of varieties available in store such as Ildi, Megabyte F1, Gigantomo, Fandango, and Akron).*
- Sow sweet and chilli peppers from mid February in a heated propagator or sunny windowsill. Chillies can be slow to germinate. *(Check out the varieties available in store such as Long Red Marconi, Trinidad Perfume.)*
- Sow aubergines in a heated propagator or sunny windowsill. *(Check out the varieties in store such as Black Beauty and Long Purple as well as the patio varieties Jackpot and Pinstripe.)*
- Sow and celeriac in a heated propagator or sunny windowsill. *(Variety, Prinz is available in store.)*
- Sow broad beans outside. *(Check out the varieties in store such as Karmazyn, de Monica, Masterpiece Green Longpod and The Sutton.)*
- Sow cabbage. Check sowing advice on packets for different varieties. *(Cabbage varieties available in store are Greyhound and Hispi.)*

- Sow peas outdoors. (*Variety, Early Onward, is available in store.*)
- Sow onions and early leeks in the greenhouse or under cover. (*Varieties, Blue Solaise, Below Zero F1 and Giant Winter are available in store.*)
- Sow early lettuce and keep in cold frame or greenhouse for earlier harvest. (*Varieties Oakleaf Navara, Salad Bowl and Little Gem Cos are all available in store.*)
- Sow hardy annuals for companion planting such as Calendula and Tagetes indoors for earlier blooms.
- Sow mustard and cress in a small seed tray on a warm windowsill for pickings in just a few weeks.
- Complete pruning of apple and pear trees, gooseberries, redcurrants and prune out a quarter of blackcurrants' older growth at ground level.
- Prune autumn raspberries, cutting all canes down to the ground.
- If summer-fruiting raspberries have grown above their supports, cut back to one or two buds above the top wire.
- After pruning, apply a general-purpose fertilizer to tree, bush and cane fruit and mulch with well-rotted manure or garden compost. (*all available in Store*)
- Top-dress all tree and soft fruit with sulphate of potash. (*available in Store*)
- Spray dormant fruit trees and bushes with plant oil-based winter tree wash (*available In Store*) to kill overwintering eggs of aphid pests.
- Apply 2" layer of well-rotted garden manure or garden compost around perennial crops such as Jerusalem artichokes or rhubarb. (*Country Natural available in Store*)
- Start pruning bush roses at the end of the month.
- Fruit bushes can still be planted now.
- Force rhubarb for sweeter, earlier stems by covering crowns with straw and then a container to exclude light.
- To reduce club root on brassicas, apply lime to soil at 270g per sq m, 8oz per sq yd. (*lime available in Store*)
- Prepare a new asparagus bed by digging in well-rotted manure and order asparagus crowns.
- Apply general fertilizers such as Growmore, (inorganic) or fish, blood and bone or seaweed, organic. (*all available in Store*)

<p>WELCOME TO NEW MEMBERS AND PLOT-HOLDERS Site 3 Sophie Arcari Jo Buckingham</p>
--

NEW SITE SECRETARY FOR SITE 2

Mariangela Renshaw is taking over from Georgina, as Secretary for Site 2, after a timed handover. Georgina is going to remain on the RGS committee.

Our sincere thanks go to Georgina who has worked very hard in the role of Site 2 Secretary for many years.

EVENTS FOR YOUR DIARY KEW GARDENS:

FEBRUARY RECIPE

Cauliflower Rice

This can be used as a substitute for rice or couscous with a casserole or curry or mixed with chopped raw vegetables as a salad.

Ingredients

1 small cauliflower – pulsed for 30 seconds

1 tsp. olive oil

Salt & pepper and 1 tsp. ground cumin

Put the cauliflower onto a baking sheet and toss in the oil and seasoning. Bake 220C/180C Fan/Gas 6 for 15 minutes.

WORMERY NEEDS A GOOD HOME

If you are interested in taking over a well established wormery from one of our members who is moving, please let me know via email patdark13@yahoo.co.uk or telephone 020 8789 7568.

NOTICES

DATES FOR YOUR DIARY

Summer Show: 16 June 2018
Autumn Show: 8 September 2018
AGM: Wednesday 14 November
2018

RGS ADDRESS AND POST BOX

Fixed to the gate at site 2, The
Pleasance. The address is:
Roehampton Garden Society The

DISCOUNTS

Adrian Hall, East Sheen

On presentation of your RGS
membership card you will receive
10% discount on horticultural
goods that you take away with you,
not on delivered items.

Neal's, Heathfield Road, SW18 3HR (opposite Wandsworth Prison)

Register for their loyalty card, as an
RGS member by showing your
membership card, giving your
name, email address, post-code. A
7% retrospective discount on
goods purchased, which can be
redeemed at the time of the next
purchase (like a Nectar card). The
amount of discount is recorded as
'points' on the card and shown on
each till receipt. £5.00 worth of
points is put on your card as a
thank you when you register.
If you are over 50, and a loyalty
card member, you will receive 10%
discount on Wednesdays.

THE CARTRIDGE PEOPLE,

Give 10% of the cost of your order
back to the Society when you buy
from:
