### **Report on WAITING LIST**

Our Primary Waiting List has grown from 260 at this time last year to 350 this year. This seems to be in line with the increasing popularity of allotments in the whole of the UK and particularly in London.

Currently those at the top of the waiting list have waited about 3 and a half years for a plot. If they are not ready to take a plot when we contact them, we offer them the opportunity to be placed on the Secondary Waiting List. This means that when they want a plot they contact us and we place them back near the top of the Primary List, so they don't have to wait too long to be offered a plot again.

If an existing plot holder wants more land they can go back on the Primary Waiting List (once they have completed at least 1 year's satisfactory cultivation). There are currently 20 existing tenants on the List.
